

The password manager that pays for itself

The cost of doing nothing

83%

Percentage of hacking-related breaches that involve stolen credentials¹

55%

Percentage of people who forget and reset their passwords, on a daily, weekly, or monthly basis, often requiring IT support²

\$4.88 million

Average cost of a data breach³

The enterprise-grade security solution

With Dashlane business plans, you get:

- ✓ Proactive breach protection for every employee
- ✓ Insights into weak & compromised credentials outside the vault
- ✓ Visibility into where employees are logging in
- ✓ Secure, frictionless access for all
- ✓ Industry-leading features such as Credential Risk Detection, automated security nudges for employees, phishing alerts, and more

“A breach could do more than take our security; it could remove the trust from our name that we’ve worked so hard to build.”

Chelsea Richardson,
VP of JD+A Architects Planners, Inc.
