

Dashlane Omnix™

Intelligent credential security

The urgent need for a new credential security approach

Hackers are exploiting human risk, and AI is accelerating cyber threats, but most businesses only respond after it's too late. To stay secure, your enterprise needs to shift from reactive to proactive credential security before a breach disrupts everything.

Meet Omnix, the AI-accelerated platform that empowers security teams and protects employees.

Omnix provides enterprise security teams with:

Proactive intelligence

Omnix pairs always-on intelligence with targeted actions so you can combat the #1 breach threat: Human risk.

Real-time response

Smart, in-context alerts prompt employees to take action against phishing and credential threats to close security gaps.

Protected access

Stay in control of shadow IT while equipping every employee with a secure browser-based vault for all their credentials.

703%

The rise in credential security attacks in 2024 compared to 2023*

“With Dashlane, we’ve been able to take a more intelligent, proactive approach to reducing potential credential risk.”

Aidan Turner, Mgr., Identity and Access Management at Downer Group

Take control of your enterprise credential security with Omnix.
