

DASHLANE OMNIX™

Deep insights. Dynamic defense.

Hackers are exploiting human risk, and AI is accelerating cyber threats. To stay secure, your enterprise needs to shift from reactive to proactive credential security before a breach disrupts everything.

Dashlane Omnix goes beyond password management to protect every employee credential with proactive, browser-based defense.

703%

The rise in credential security attacks in 2024 compared to 2023*

Omnix provides enterprises with:

End-to-end oversight

Identify credential-based threats, phishing attempts, and compromises with 24/7 monitoring across all company-managed browsers.

Real-time response

Close security gaps with automated, in-context alerts that prompt employees to take action against phishing and credential threats.

Protected access

Stay in control of shadow IT while equipping every employee with a secure browser-based vault for all their credentials.

“Omnix has become our standardized intelligent credential management solution across the organization.”

Leo Cunningham, CISO at Owkin

Secure every credential with Omnix™.
